Teaching

- AAE 731 *Frontiers in Development Economics II*. Formal techniques of trade-theoretic general equilibrium analysis are used to analyze problems of economic growth and development, international trade and policy, income distribution and poverty, structural adjustment, and globalization in developing countries.
- AAE 473 *Economic Growth and Development in Southeast Asia*. The major nations of Southeast Asia are distinguished from the rest of the developing world by two main factors: very rapid economic growth and relative openness to trade. The course uses simple economic development models and SE Asian data to explore linkages between economic growth, trade, resources, policies, prices, and poverty alleviation. Cross-listed as Econ 473.
- AAE 374 *Growth and Development of Nations in the Global Economy*. This course explores the roles of markets, states, and civil institutions, using economic theory, computer simulations, and historical experience to better understand the forces that shape the wealth and well-being of nations and people around the world. Cross-listed as IS374.
- AAE 373 *Globalization, Development and Poverty*. Addresses economic questions about the nature of globalization, globalization processes (focusing on trade, international capital flows, migration and remittances, and development assistance), the consequences of increasing integration in the global market, and the characteristics of developing economies that mediate globalization outcomes. Cross-listed as IS373.
- AAE 875 *Trade, Resources and Development*. Graduate seminar on growth and development in 'small, open' developing economies. Analytical general equilibrium models with case studies drawn from the literature. Versions have been offered in

- short course form in the Philippines (2002), Thailand (2004), UW-Madison (2003) and Norway (2007, 2009).
- AAE635 *Applied Microeconomic Theory*. Mathematical treatment of canonical intermediate microeconomics: unconstrained and constrained optimization, producer and consumer theory, markets and general equilibrium, etc. Taught 1999, 2000.
- Principles of Macroeconomics* Hanoi University of Agriculture, 2009, 2011, 2013.
